IMPORTANT RISK INFORMATION:

Large-Cap Company Risk: Large-capitalization companies are generally more mature and may be unable to respond as quickly as smaller companies to new competitive challenges. **Mid-Cap Company Risks:** Investing in mid-capitalization companies involves greater risk than is customarily associated with larger, more established companies. Mid-cap companies frequently have less management depth and experience, narrower market penetrations, less diverse product lines, less competitive strengths and fewer resources. **S&P 500 Index:** The referenced index is shown for general market comparison and is not meant to represent the fund. Index performance is not illustrative of the fund's actual performance.
